

# DEMONSTRATION AND DEPLOYMENT STRATEGY WORKSHOP

To register for this workshop or check for updates,  
please visit the [Demonstration and Deployment Workshop  
Registration Web page](#).

The Department of Energy's (DOE's) Bioenergy Technologies Office (BETO) is hosting a Demonstration and Deployment strategy workshop on March 12-13 2014, at Argonne National Laboratory's Advanced Photon Source conference center outside of Chicago, Illinois.

As the bioenergy industry begins commercial scale cellulosic ethanol production, BETO will identify the next step(s) in drop-in hydrocarbon biofuel production. This workshop intends to discuss, reassess, and prioritize the demonstration and deployment efforts needed to realize affordable, scalable, and sustainable production of hydrocarbon biofuels.

U.S. DEPARTMENT OF  
**ENERGY**

Energy Efficiency &  
Renewable Energy

## University, national laboratory, industry, advocacy, government and other stakeholders will consider the following questions:

- What is the state of technology of hydrocarbon biofuel manufacturing, as well as supportive bioproducts or chemicals?
- What are the technical, conversion, feedstock logistics, and market barriers to deployment of hydrocarbon biofuels?
- What are the highest priority barriers and what strategies can overcome these barriers?

### The outcomes of these discussions are expected to result in the following

- Determine how BETO can accelerate industry's efforts
- Develop strategy and future plans
- Lead to a breakout session at the Biomass 2014 conference on July 29-30th
