

# Clean Cities National Parks Initiative Project Success Story Form

Do you know about a successful petroleum-reduction activity or clean-transportation project that should be featured with the [National Parks Initiative projects](#)? In addition to being on the Clean Cities website, these success stories can be featured in U.S. Department of Energy and U.S. Department of Interior publications and in videos with potential national television coverage. These success stories should be related to alternative fuels, advanced vehicle technologies, and smart driving practices, and they must be projects at NPS units.

To submit a success story idea, complete the form below and click the "Submit by E-Mail" button in the upper-right corner of this page or save the form and e-mail it to [andrew.hudgins@nrel.gov](mailto:andrew.hudgins@nrel.gov).

Clean Cities partners with the [National Park Service](#) (NPS) through the Clean Cities National Parks Initiative to support the use of renewable and alternative fuels, electric drive vehicles, and other vehicle energy-saving practices to help preserve air quality and promote the use of domestic energy resources in the parks.

## 1. Contact Information

Name:

Title:
