

Building the Clean Energy Economy, Engaging the Private Sector

The U.S. Department of Energy's Office of Energy Efficiency and Renewable Energy (EERE) invests in clean energy technologies that strengthen the economy, protect the environment, and reduce dependence on foreign oil. EERE delivers innovative energy solutions through strategic cooperation with universities, industry, and National Laboratories. EERE maintains strong private sector relationships, which are helping the U.S. transform its economic engine to one powered by clean energy.

This packet provides a list of companies with whom EERE's program offices collaborate. Below is a list of EERE's program managers and their contact information should you or your organization be interested in pursuing opportunities with EERE.
