

Electronic Handbook of Industrial Resources

WYOMING

Electronic Handbook of Industrial Resources

WYOMING

November 2010

Introduction

This handbook provides a comprehensive listing of incentives, tools, and resources for industrial manufacturing energy efficiency in the state of Utah. The document is organized according to industrial system and features information on rebates, waived fees, tax credits, loans, and other resources, such as analysis tools, education and training programs, and energy assessments. The handbook is based on data available in the *States Incentives and Resources Database*, which is maintained by the U.S. Department of Energy (DOE) Industrial Technologies Program (ITP).

The *States Incentives and Resources Database* is a comprehensive searchable online database of approximately 3,100 energy efficiency incentives organized by state. The database is updated regularly and is accessible via the Save Energy Now State and Regional Partnerships' Web site:

http://www1.eere.energy.gov/industry/states/state_activities/incentive_search.aspx

State Industrial Overview

Largely covered by mountains, Wyoming has a total of 500,000 million residents and ranks 49th in GDP, representing \$35.3 billion. It is the tenth largest state in terms of geographic area but is the least populous¹

Wyoming is known for having substantial fossil fuel deposits. It is second only to Montana in recoverable coal reserves. The state also has significant potential for wind power. Its leading consumer of energy is the industrial sector made up largely of mining, oil, and gas industries. In 2008, Wyoming ranked 31st in the nation's industrial energy consumption at 302.2 trillion Btu and 21st in the nation's industrial natural gas consumption at 104.2 trillion Btu²

Exhibit 1 below compares the industrial energy consumption in Wyoming in relation to the national average. The chart in Exhibit 2 is a visual representation of the same data.

Exhibit 1: Total Industrial Energy Consumption Statistics in Wyoming

Year	Wyoming Energy Consumption (Trillion Btu)	National Average (Trillion Btu)
2000	234.1	680.2
2001	242.3	642.8
2002	241.8	642.0
2003	248.8	639.6
2004	245.6	658.7
2005	245.3	696.7
2006	258.4	636.6
2007	292.5	637.0
2008	302.2	614.8

Exhibit 2: Total Industrial Energy Use

Federal and National Industrial Energy Efficiency Programs

In addition to the state level programs outlined in more detail in section III there are many government and non-government organizations that have resources to assist industry in the western region to utilize energy more effectively. Financial and technical resources are available from federal agencies, national laboratories, utilities, utility associations, industrial organizations, energy efficiency organizations, state energy offices, energy services companies, nonprofits or nongovernmental organizations, foundations, and private companies.

ITP is one such program that provides industrial manufacturers across the country with a variety of energy efficiency tools, resources, and incentives. ITP is a prime example of DOE's commitment to improving the energy efficiency of industrial operations in the United States. ITP is a multi-faceted outreach and deployment initiative designed specifically for industrial manufacturers. ITP supports research and development of energy efficient technologies, provides industry with energy management and assessment tools, resources, and information.

Several other federal agencies offer energy efficiency incentives in addition to the multitude of DOE resources. The Internal Revenue Service, for instance, provides tax incentives to industrial manufacturers that implement energy efficiency projects. In addition, the U.S. Environmental Protection Agency provides loans on new energy efficient construction and incentives on the implementation of combined heat and power systems. Finally, the U.S. Department of Agriculture is another federal agency that provides incentives to rural and small industrial operations seeking to become more energy efficient.

State Incentives by Industrial System

Building Systems

Direct Contact Gas Water Heaters

Questar offers rebates for natural gas-based water heaters with a thermal efficiency greater than 90%. The rebate is calculated at \$1.10 per kBtu/hr input.

Sponsor Type: Other

High-Efficiency Storage Gas Heaters

Equipment Eligibility Rebates are available for natural gas storage water heaters that meet or exceed the efficiency requirements. Rebates are \$2 per kBtu/hr input.

For More Information:

http://www.thermwise.com/business/Business_Rebates_Brochure.pdf

Sponsor: Questar Gas

Sponsor Type: Utility

High-Efficiency Tankless Gas Water Heaters

Commercial customers that install natural gas tankless water heaters with less than 200,000 Btu per hour of energy input are eligible for this incentive. The rebate is set at \$2 per kBtu per hour input.

For More Information:

http://www.thermwise.com/business/Business_Rebates_Brochure.pdf

Sponsor: Questar Gas

Sponsor Type: Utility

Solar Rebate Program

Lower Valley Energy will provide a \$400+ rebate to residential and commercial customers who install photovoltaic and/or solar water heater collectors in its service territory.

For More Information:

<http://www.lvenergy.com/Documents/SolarRebateWEBSITE.htm>

Sponsor: Lower Valley Energy

Sponsor Type: Utility

Water Heater Rebate

Black Hills Power offers water heater rebates at \$1 per gallon. In order to qualify for the rebate, the water heater must hold more than 30 gallons and produce less than 4,500 watts at 240 volts. The maximum rebate is \$800 per customer.

For More Information:

<http://www.blackhillspower.com/cimktg.htm>

Sponsor: Black Hills Power

Sponsor Type: Utility

Water Heater Rebate

Carbon Power and Light customers will qualify for this rebate on the installation of an energy efficient water heater. Rebates are based on \$1.50 per gallon up to \$75.

For More Information:

<http://www.carbonpower.com/rebates.htm>

Sponsor: Carbon Power and Light

Sponsor Type: Utility

Water Heater Rebate

Wheatland Rural Electric Association will provide a rebate of \$1 per gallon toward the purchase of an energy efficient water heater. In addition, the water heater is eligible for an additional \$75 mail-in rebate. If the water heater is controlled for time-of-day loads, it is eligible for another \$25 rebate.
