

U.S. Department of Energy
Energy Efficiency
and Renewable Energy

Bringing you a prosperous future where energy
is clean, abundant, reliable, and affordable

*FreedomCAR and Vehicle
Technologies Program*

2004
ANNUAL
PROGRESS
REPORT

AUTOMOTIVE LIGHTWEIGHTING MATERIALS

*Less dependence on foreign oil, and eventual transition to
an emissions-free, petroleum-free vehicle*

**U.S. Department of Energy
Office of Freedom Car and Vehicle Technologies
1000 Independence Avenue S.W.
Washington, DC 20585-0121**

FY 2004

Progress Report for Automotive Lightweighting Materials

Energy Efficiency and Renewable Energy FreedomCAR and Vehicle Technologies

**Edward J. Wall
Program Manager, FreedomCAR and Vehicle Technologies**

**Rogelio Sullivan
Materials Technologies Team Leader**

**Joseph Carpenter
Technology Area Development Manager**

April 2005

CONTENTS

1. INTRODUCTION	1
2. AUTOMOTIVE ALUMINUM R&D.....	7
A. Active Flexible Binder Control System for Robust Stamping	7
B. Warm Forming of Aluminum II.....	17
C. Electromagnetic Forming of Aluminum Sheet	31
D. Aluminum Automotive Closure Panel Corrosion Test Program	39
E. Development of the Infrared Thermal Forming Process for Production of Aluminum Vehicle Components	49
3. ADVANCED MATERIALS DEVELOPMENT	57
A. Low-Cost Powder Metallurgy Technology for Particle-Reinforced Titanium Automotive Components: Manufacturing Process Feasibility Study	57
B. Low-Cost Cast Aluminum Metal Matrix Composites	61
C. Structural Cast Magnesium Development	69
D. Magnesium Powertrain Cast Components	75
E. Low-Cost Titanium Evaluation.....	83
F. Structural Reliability of Lightweight Glazing Alternatives	87
4. POLYMER COMPOSITES R&D	95
A. Development of Manufacturing Methods for Fiber Preforms	95
B. Composite-Intensive Body Structure Development for Focal Project 3	103
C. High-Volume Processing of Composites	111
D. Development of Next-Generation Programmable Preforming Process	119
5. LOW-COST CARBON FIBER.....	125
A. Low-Cost Carbon Fibers from Renewable Resources	125
B. Low-Cost Carbon Fiber Development Program	133
C. Low-Cost Carbon Fiber Manufacturing Using Microwave Energy.....	143
D. Oxidative Stabilization of PAN Fiber Precursor.....	147
6. RECYCLING.....	153
A. Recycling Assessments and Planning	153
B. Baseline Assessment of Recycling Systems and Technology	157
C. Postshred Materials Recovery Technology Development and Demonstration.....	165
D. Development of Technology for Removal of PCBs and Other Substances of Concern (SOCs) from Shredder Residue.....	175
E. Compatibilization/Compounding Evaluation of Recovered Polymers	181

7. ENABLING TECHNOLOGIES.....	185
A. Durability of Carbon-Fiber Composites	185
B. Interphase Analysis and Control in Fiber-Reinforced Thermoplastic Composites	193
C. Low-Cost Test Methods for Advanced Automotive Composite Materials; Creep Compression Fixture	199
D. Intermediate-Rate Crush Response of Crash Energy Management Structures	205
E. Composite Crash Energy Management	211
F. Crash Analysis of Adhesively Bonded Structures (CAABS).....	221
G. Long-Life Electrodes for Resistance Spot Welding of Aluminum Sheet Alloys and Coated High-Strength Steel Sheet (ORNL).....	229
H. Long-Life Electrodes for Resistance Spot Welding of Aluminum Sheet Alloys and Coated High-Strength Steel Sheet (USAMP).....	237
I. Plasma Arc Spot Welding of Lightweight Materials.....	245
J. Performance Evaluation and Durability Prediction of Dissimilar Material Hybrid Joints	247
K. Joining of Dissimilar Metals for Automotive Applications: From Process to Performance.....	255
L. Application of Thread-Forming Fasteners (TFFs) in Net-Shaped Holes	263
M. NDE Tools for the Evaluation of Laser-Welded Metals	267
N. NDE Inspection of Resistance Spot Welds in Automotive Structures Using an Ultrasonic Phased Array	277
O. Technical Cost Modeling.....	287
8. HIGH-STRENGTH STEELS	293
A. Evaluations of the Effects of Manufacturing Processes and In-Service Temperature Variations on the Properties of Transformation-Induced Plasticity (TRIP) Steels	293
B. High-Strength Steel Stamping Project.....	297
C. Strain Rate Characterization.....	301
D. Development of Advanced Tools for Energy Management	307
E. Lightweight Front Structures.....	315
F. Hydroform Materials and Lubricants Project	323
G. High-Strength Steel Joining Technologies Project.....	327
H. Sheet Steel Fatigue Characteristics.....	335
I. Tribology	339
J. Lightweight Closure Panels Project	343
Appendix A. ACRONYMS AND ABBREVIATIONS	347

A Strong Energy Portfolio for a Strong America

Energy efficiency and clean, renewable energy will mean a stronger economy, a cleaner environment, and greater energy independence for America. Working with a wide array of state, community, industry, and university partners, the U.S. Department of Energy's Office of Energy Efficiency and Renewable Energy invests in a diverse portfolio of energy technologies.
