Washington, DC 20585-0121**

FY 2003

Progress Report for High Strength Weight Reduction Materials

**Energy Efficiency and Renewable Energy
Office of FreedomCAR and Vehicle Technologies
Advanced Materials Technologies**

Edward Wall	Program Manager, OFCVT
Rogelio Sullivan	Materials Technologies Team Leader
Sidney Diamond	Technology Development Area Specialist

April 2004

CONTENTS

1. INTRODUCTION.....	1
2. MATERIALS DEVELOPMENT	7
A. Integrated Approach for Development of Energy-Efficient Steel Components for Heavy Vehicle and Transportation Applications.....	7
3. MATERIALS PROCESSING TECHNOLOGIES.....	15
A. Oxidative Stabilization of PAN Fiber Precursor	15
B. Wrought Magnesium Alloy/Process Development	21
C. Equal Channel Angular Extrusion	29
D. Equal Channel Angular Extrusion Processing of Alloys for Improved Mechanical Properties	39
E. Lightweight High-Strength Steel Alloy Castings for Heavy Vehicle Applications	49
F. Development of an Advanced Squeeze Casting Process for the Production of High-Integrity Truck Components.....	55
G. Ultra-Large Casting Benchmark Study for Aluminum and Magnesium Alloys: Phase II	61
4. ENABLING TECHNOLOGIES.....	69
A. Improved Friction Tests for Engine Materials	69
B. Laser Glazing of Railroad Rails to Reduce Friction.....	73
C. Laser Surface Texturing of Seal Faces.....	79
D. Joining of Advanced Materials by Plastic Deformation	85
E. Friction Stir Joining and Processing of Advanced Materials, Including Metal Matrix Composites	93
F. Friction Stir Processing of Advanced Materials	101
G. Basic Studies of Ultrasonic Welding for Advanced Transportation Systems.....	109
H. Attachment Techniques for Heavy Truck Composite Chassis Members	119
5. LIGHTWEIGHT VEHICLE STRUCTURES	127
A. Lightweight Stainless Steel Bus Frame: Phase III.....	127
B. Large Castings for Advanced Cab Structures.....	135
C. New-Generation Frame for Pick-Up/Sport Utility Vehicle Application	137
6. APPLICATION OF INNOVATIVE MATERIALS.....	141
A. Advanced Materials for Friction Brakes	141
B. Advanced Composite Structural Cab Components	145
C. Advanced Composite Structural Chassis Components.....	149
D. Carbon Fiber Sheet Molding Compound for Class 8 Vehicle Hoods	153
E. Advanced Composite Support Structures	157
F. Hybrid Composite Materials for Weight-Critical Structures.....	161
G. Application of Carbon Fiber for Large Structural Components	165
H. High-Conductivity Carbon Foam for Thermal Management in Heavy Vehicles	177
I. Lightweight Functional Composite Materials.....	185

7. MAINTENANCE, REPAIR, RECYCLE.....	191
A. Effects of Highway Ice-Clearing Treatments on Corrosion of Heavy Vehicle Materials and Components.....	191
APPENDIX A. ACRONYMS AND ABBREVIATIONS	199
